PROFILE

FRONT-END SOFTWARE ENGINEER

Open-source enthusiast. My main expertise is in Javascript, React and Redux. I have also some 'hands-on' experience in backend development. I love learning new things and experiment with new technologies. In my spare time, I'm a mentor in a mentorship programme for people who just start in IT and are interested in changing their career field.

PROFESSIONAL EXPERIENCE

06.2019 - Present

SOFTWARE ENGINEER

MOONCASCADE, TALLINN, ESTONIA

- Developing & maintaining external project for clients in Fintech and Mobility industries.
- Developing internal projects (e.g. voice bot to improve website accessibility).
- Technical expert for project management.
- Member of the company's team during Digiriigi Hääton 3.0 - an event aimed to solve Estonian public sector issues.
- Member of the company's team during 72h hackathon aimed to help organize the Global Crisis Hackathon - we prepared a website completely covered with CMS to enable organizing team to be completely independent with the content.
